SOLARSHEAT 1500G

How it works?

The SolarSheat 1500G is a glazed recirculation solar air collector designed for space heating applications. Air is drawn from inside the room through the bottom of the collector and blown out through a duct in the top. The SolarSheat 1500G can heat an area of the home or room up to 1 000 ft² or 93 m² when the sun is shining. Multiple collectors can be connected together can heat larger areas or rooms. An external digital control let's you preset the temperature for the collector to start heating.

Installation

Installation is quick and easy using our patent pending mounting strip SolarSheat Mount. Perfect for do-it-yourself or contractor friendly.

External Control

The SolarSheat 1500G includes an external digital control that allow you to preset your room temperature. The unit can deliver up to 120°F or 49°C (estimated) for room heating.

Fan

The fan allows a proper flow of air up to 150 CFM for adequate room heating.
